Senior Data Engineer and M.S. Computer Science candidate with 5+ years of experience building data pipelines, analytics infrastructure, and reporting systems for enterprise clients including OpenAI. Experienced in Python, SQL, Snowflake, cloud technologies, and AI-assisted workflow automation.

EDUCATION

University of Pennsylvania, School of Engineering

Expected 2027

Master of Applied Science in Computer Science, Concentration in Artificial Intelligence

Vanderbilt University

Graduated May 2021

Bachelor of Arts: Double Majors in Economics and Media Arts

CORE COMPETENCIES

Languages: SQL, Python, Java, HTML, CSS, JavaScript

Databases: Snowflake, BigQuery

ETL Pipelines: Matillion, REST APIs, Apps Script, dbt

Cloud & Infra: Docker, AWS S3 · ECR · EC2 · EMR · Lambda · Amplify

AI & Automation: Prompt engineering, AI-assisted development, workflow automation

Visual Dashboards: Looker, Tableau, Domo

Developer Tools: Git, Postman, JIRA, Confluence, DBeaver, Jupyter Notebooks, PyCharm, Eclipse, IntelliJ

Marketing Platforms: Google Analytics 4, Campaign Manager, Kantar, MRI Simmons, Brandwatch, Kochava

Soft Skills: Stakeholder Communication, Cross Functional Collaboration, Problem Solving, Leadership

PROFESSIONAL EXPERIENCE

DEPT® Agency | Lead Data Technology Engineer (Client: OpenAI)

Aug 2025 - present

- Translate OpenAI's reporting and data needs into technical requirements, roadmap plans, and production systems supporting \$2B+ in annual marketing spend.
- Architect end-to-end pipelines, API integrations across 50+ platforms, enabling reliable and scalable data models.
- Serve as the technical liaison between engineering & marketing teams, ensuring successful reporting deliverables.
- Identify tooling and infrastructure gaps, prototype internal tools, and enhance cloud-based workflows.
- Leverage AI to accelerate development, automate workflows, build new tools to improve data accessibility.
- Mentor junior engineers and establish technical standards, documentation, and operating practices across projects.

DEPT® Agency | Senior Business Intelligence Engineer (Client: Meta, TurboTax) *June 2024 - Aug 2025*

- Owned Tableau dashboards & automated GSheets, managing the full data cycle from ingestion to visualization.
- Designed and launched an automated Google Sheets data store tool using Apps Script, Matillion and Snowflake, reducing manual effort and turnaround time for adhoc data pull by 80%.
- Monitored production alerts, investigated failures, resolved data-quality issues to maintain downstream outputs.
- Facilitated agile delivery as Scrum Master, driving backlog grooming, brainstorming, & project execution.

DEPT® Agency | Business Intelligence Engineer (Client: Nextdoor, Pandora)

Oct 2022 - June 2024

- Developed backend Snowflake SQL views powering automated reports & Tableau dashboards for 100+ clients.
- Designed ETL/ELT pipelines infrastructure integrating APIs, sFTP, cloud storage into Snowflake via Matillion.
- Developed Python scripts to ingest JSON responses from custom endpoints, using Pandas for data cleanup.
- Built automated Slack alerting systems with SQL, Python, and Matillion to transform and aggregate complex datasets into clear, client-ready insights, reducing issue resolution time by 40%.
- Troubleshooted 200+ JIRA tickets for the Client Services teams on data discrepancies and integration issues.
- Cleaned up Snowflake database with over 1,000 tables/views, achieving a 30% reduction in warehouse costs.
- Wrote detailed documentation on Confluence to improve operational clarity and cross-team collaboration.

FIG Agency | Data Analyst (Client: Simple Mills, Children's Hospital Colorado) *June 2021 - Oct 2022*

- Managed the data ingestion process into Domo warehouse, sourcing from emailed reports & API connectors.
- Designed 50+ interactive visualizations on Demo and automated the media insights generation process using Python to reduce manual workload, supporting monthly analytics and successful business pitches.
- Handled troubleshooting ad hoc data collection & taxonomy issues, ensuring data accuracy and consistency.
